

Starlink™ Standard DC Relay Conversion

Eliminate the Starlink™ AC power supply and router, conserve power with the DishyNOAC, using native DC power and avoiding inverter losses.

This conversion includes replacing the Starlink™ router with an AX1800 router featuring a 1 Gbps (1000 Mbps) WAN Ethernet port.

An optional 4G/5G-enabled router can be used for “failover” connectivity when Starlink™ is turned off.

Relay Power Switch for convenient placement of on/off switch or switch via control system such as Victron Cerbo and avoid longer thn necessary cable runs. See Starlink™ Standard DC Cerbo Conversion.
